

Obturator for bone cavities

Patent number: FR2708192
Publication date: 1995-02-03
Inventor: MARC-ANDRE CAHLIK
Applicant: CAHLIK MARC ANDRE (FR)
Classification:
- **International:** A61B17/56; A61F2/28
- **European:** A61L27/50, A61F2/30B1
Application number: FR19930015022 19931210
Priority number(s): FR19930015022 19931210; FR19930008119 19930702

Abstract of **FR2708192**

Obturator (100) for bone cavities, made of at least one absorbable biocompatible material.
According to the invention, the said obturator includes an element (110) made of flexible material which can expand laterally so as to produce forced obturation of the said bone cavities.
Application to the fitting of prostheses or implants in orthopedic surgery using surgical cement.
